

La San Marco

PRODUCT RANGE UPGRADE

OCTOBER 2018

In view of the reorganisation of our product range, we present the new models in our traditional coffee machine range, available from **1 January 2019**.

**NEW
ENTRY**

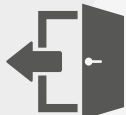

ROMA SPACE

The new Roma Space – the second-born in the Roma family – despite its **very compact size (only 570 mm wide)**, is a powerful and high-performing electronic coffee machine.

An absolute first for La San Marco, Roma Space boasts **2 steam nozzles** with manual screw knob activation, 2 programmable water doses, the new hot water diffuser, stainless steel boiler (ideal for hygiene safety) and a clean and elegant design, emphasised by the backlit controls.

THE 85E SPRINT MODELS WILL BE REPLACED BY THE ROMA SPACE MODEL

85 E SPRINT Electronic
